adjutum me esse non solum Germanorum, sed etiam Gallorum *) quorundam doctorum et laboriosorum studiis et exemplis: quamquam tantas hi copias effuderunt, ut rivos claudere cogerer potius, quam aperire. Nam Britannia **) et Italia ***) hoc quidem in genere repetendis pristinorum saeculorum inventis sat habet; Batavia, quamquam etiam nunc ferax poetarum latinorum, Germanorum et Gallorum hujus libri editiones discipulis suis suppeditare solet.

His exemplis inductus sum, ut etiam res christianas, quas fuerunt qui omissas vellent, auctas exhiberem, quum, quia sic intelligi potest, quomodo ad diversissimas res traduci possit linguae latinae ingenium, tum quia in multis scholis, quippe christianis, argumenta ejusmodi discipulis proponi solent. Ac *Quicheratus* quidem summam curam adhibuit ad hos poetas legendos et afferendos, quod pro eo, quem sibi proposuit, operis ambitu rectissime fecit. Nec omnes sunt prorsus indigni, qui ad codd. mss. auctoritatem diligentius recenseantur et uno corpore comprehensi venum eant.

Nec recentioris aetatis res gestas omnes subtraxi adolescentulorum cognitioni, ne, quoniam imitando praecipue consumi debet omnis eorum opera, derelictos se quererentur. Multum vero impediebar, quod nemo exstitit, qui hos poetas praestantiores uno corpore collectos vel potiores certe excerptos dederit, quo amandarem lectores. Nam nec quem *Noëlius*

Quicherat.*" Par. 1836. Hi enim soli praeter caeteros Gallos, qui in eodem genere elaborarunt in usum scholarum, grandiora opera complexi sunt. Ac *Noëlius* quidem *Vanierium* maxime secutus est; *Quicheratus* novam quandam ac suam rationem iniit, omniumque et doctissime et accuratissime versatus, hoc tamen incommodi habet, quod omnia fere, quae ex grammaticis et lexicis discipuli petere possunt nota et ignota, vulgata et rara, certa et incerta, in unum coacervavit locum. Eoque diligentiae dicam an curiositatis progressus est, ut varias lectiones examinet, suas conjecturas depromat, virorum doctorum opiniones ponderet, ac ne remotissima quidem spernat. Explicationes rerum ac verborum vernaculas, quales lexica nostra breviter offerunt, ut est Gallorum ac caeterorum populorum in his libris prosodiacis mos, neuter omisit. Comicorum poëtarum exempla, *Lindemanni* opera adjutus, constanter profert *Quicheratus*, nec reliquorum poëtarum antiquiorum et Christianorum mentionem suppressit, recentiores vero, quos *Noëlius* ex Vanierii enchiridio retinuit, sciens ac volens praeteriit. Ac nemo non *Quicheratum* summa industriae laude dignum censebit, vereque eum scripsisse existimabit initio praefationis: Il y a dix ans que j'ai conçu l'idée de cet ouvrage, et que je recueille des matériaux en conséquence; il y en a huit que j'y travaille sans relâche et à peu près sans partage."

fecit delectum *), etsi iterata editione commendatum, nec si quem alii fecerunt, satis aptus erat ad id, quo ego contendebam. Idcirco hanc consilii mei partem minus, quam vellem, explevi, veritus etiam, ne praeter modum volumen cresceret. Sed postea, si fors ita tulerit, et quoniam descriptionum sedes brevissime indicari possunt, stabo promissis. Neque tamen, quod quasi praemuniendae excusationis causa addo, quidquam afferam ex iis poetis, qui ὁμοιοτελεύτοις versibus scripserunt: peculiare enim est hoc genus et ab institutione puerili alienum, etsi suos habet amatores **).

Caeterum si quid ab intelligentibus viris fuerit propositum, quod ad emendandum hunc librum facere posse videatur, gratissimo animo excipiam diligentissimeque exsequar, ac, si a perfectione nunc minus, quam antea, eum abesse dicant, laboris multi et haud semper jucundi jucundissimum habebo praemium.

Redit ad *Te*, *Vir Praestantissime*, hic liber, quem anno 1828 primum *Tibi* misi nomini *Tuo* inscriptum, tanquam testem qualemcunque cum acceptorum a *Te* beneficiorum, tum animi erga Te mei. Nam quum per septem fere annos, quos Vitebergae traduxi, gymnasii per *Te* potissimum sustentati praeceptor ac rector, voluntatis *Tuae* documenta manifesta habuissem et postea humanitatem *Tuam* saepius essem expertus, non debui committere, ut alios hoc lateret. Adeo enim semper exhorrui ingrati animi crimen, ut mallem tenue quoddam veluti signum palam collocare, quam, ubi referre gratiam non possem, intra parietes cohibito vel clam expromto pietatis sensu, videri callide removere ab hominum cognitione, quae aliis deberem, et bene de me meritos homines negligere, vel, quod impium fere est, justa laude privare.

Quae quum ita sint, accipe, *Vir Amplissime*, quod a me denuo *Tibi* offertur, hoc studii sinceri et ab omni adulatione alieni pignus, paulo nunc accuratius expolitum. Nam, quin pristini mei temporis officia diligenter sancteque servare ac tueri studerem, *Te* non dubitasse

satis cognovi ex epistolis subinde ad me datis. Etsi enim fato quodam meo, quod *Tu* non ignoras, factum est, ut corpus secluderetur ab imperio Borussico, nunquam tamen vel animus potuit abalienari, vel desii admirari praeclaram *Regum Vestrorum Sapientissimorum* liberalitatem et summam *Collégii Vestri* curam, quae litterarum artiumque officinas, praesertim quum pacis diuturnitate otium confirmatum esset, ubique aperuit, conservavit, rexit, auxit, ornavit.

Atque harum laudum non minimam partem ad *Te* pertinere, quis est, qui nesciat? *Tu* igitur, quod adhuc diu ac prospere fecisti, ut in posterum facias, quantum anni crescentes patiuntur, atque, ubi res non siverint, ut, quam paratissimam habes vitae laborumque comitem, recte factorum conscientia fruaris et aetatis praeclare actae memoria recolenda laeteris, vehementer etiam atque etiam opto. Hujus libri et antiquissimi et multo scholarum usu triti, quem Hahnius, vir honestissimus, ex Darnmanniorum Züllichaviensium reliquiis redemerat, postquam mihi data est cura, id egi, ut, quidquid vitiorum decessores ex prioribus editionibus *) reliquissent, quod sane exspectatione plus fuit,

*) Novissima editio, quae Norimbergae apud G. N. Raspe vulgata est a. 1794 uno volumine, editoris quidem nomine non posito, in fronte appellatur „denuo recognita et a vitiis typographicis, quibus praecedentes scatebant, quam maxime purgata.“ Praeterea autem, quantum ea ipsa de sese profiteatur, apparet ex eo, quod dicitur „novus synonymorum, epithetorum et phrasium poëticarum thesaurus, elegantias Ravisii Textoris poëticas, Parnassum poëticum, Thesaurum Virgilii, Smetium, Januam Musarum aliosque id genus libros ad poësin necessarios complectens, in quo singulis etiam phrasium syllabis ac nominum et verborum incrementis appositae sunt notae, quantitatis indices, una cum poëtarum testimoniis, quorum auctoritate singularum vocum quantitas comprobatur. Accedunt, quae ex historia, fabula et geographia ad poëticam artem conferunt; inseruntur descriptiones et comparationes plurimae, ex optimis poëtis excerptae, addito praxis poëticae a Paulo Aler ad facilem et perutilem studiosae juventutis usum conscriptae compendio.“ Hoc unum enim tenuitatis puerilis adminiculum, quum antea Germania haberet, et in schola Afrana, quae est Miseni ad Albim in Saxonia, ubi ferveret hoc genus exercitationum, assurgeret ultra hanc summam mediocritatem qualecunque meum ac condiscipulorum studium, memini plures nostrûm ante XXXV annos, ut est adolescentia prona ad emendandum, vel spe ac consilio, vel ipso aggressu, conspirare in eo, ut, quod deerat, condere aliquando statueremus conjuncta opera. Postea ad graviora progressi antiquitatis et litterarum studia, *C. A. Lobeckio* V. Cl. duce, qui nunc academiam Regimontanam ornat, tum in Vitebergensi docebat, quum in versibus latinis faciendis, quam sive artem sive oblectationem ex quotidiano usu Afrano retinuissemus promtam ac facilem, ipsi ejusmodi adjumento vix egeremus et alia moliri coepissemus, non prius cogitavimus de libris scholasticis melius instituendis, quam quum ipsa officii necessitas ac sanctitas nos id facere coegit. Sed, ubi a. 1813 alii aliis in locis publice evocati ad adolescentes in gymnasiis erudiendos accessimus, quae nobismet ipsis olim discentibus fuissent vel reapse nota incommoda vel impedimenta aliunde objecta, tum melius sentire et, quantum possemus, corrigere studuimus, partim de communi consilio, vel conscii saltem, partim causis separatim susceptis. Interea *C. H. Sintenisius*, gymnasii Zittaviensis in Saxonia praefectus, a. 1815. nec opinantibus nobis hunc librum auctum quidem correctumque edidit, sed ita tamen, ut multa etiam nunc desiderarentur. Sed, ne, quid decessores praestiterint vel voluerint efficere, aut dissimulare viderer, aut ignorarent lectores, utriusque praefationem subjeci, ac *C. H. Sintenisii* *) quidem in brevius contractam, *O. M. Mül-*

viensis praefectus, vetus meus amicus ex Afrano convictu et ex Lobeckii disciplina, Torgaviae, ego Vitebergae, et de rebus scholarum emendandis coram ac per litteras saepenumero colloqueremur, hujus quoque libri rectius instituendi facta est mentio. Aliquanto post in alios locos, remotos sane, delati sumus. Hic casu accidit, ut, quod ille graecorum [a]) versuum componendorum adjumento edendo studium impendit, ego latinis [b]) versibus commendandis darem. Nec satis hoc. Nescii idem agentes etiam hunc *Gradum ad Parnassum* suo uterque modo emittimus auctum, emendatumque, ac praefationes eodem die scribimus Id. Sept. a. 1828, ille Zittaviae, ego Brunswigae. Nec quidquam convenerat inter nos, sed potius, ut fit in tanto locorum intervallo et in summis munerum vitaeque occupationibus, intermissum erat pristinum litterarum commercium. Hoc ego, ne quis forte miraretur, paucis commemorandum duxi.

*) „Tradidi jam Vobis, *Juvenes Amatissimi*, librum recens a me editum, qui ad sustentandum *versuum latine scribendorum* studium multum adjumenti Vobis afferre poterit, omnibusque juvenibus, eodem studio flagrantibus, olim jam attulisse praedicatur, nunc vero, rarior factus, difficulter comparari potuit, ita, ut ejusmodi libellus magnopere desideraretur. *Gradus ad Parnassum*, qui inscribitur, libris utilissimis, quibus juvenum institutioni bene consuleretur, pristinis temporibus annumerabatur, tantamque nominis celebritatem sibi conciliavit, ut mihi fere religioni ducerem, obsoletam ejus inscriptionem cum illa, qua *Promtuarium prosodicum* nominaretur, permutare. Continet hic liber non solum *vocum singularum*, secundum ordinem alphabeticum prolatarum, *synonyma* et *epitheta*, sed etiam *integras dicendi formas*, a poëtis in usum receptas, et *uberiores multarum rerum comparationes et descriptiones*, apud poëtas obvias, ut facile intelligere possitis, ejusmodi libro permagnam utilitatem, ad addiscendam *versuum latine componendorum* facultatem, non esse denegandam, propterea quod tales res complectitur, quae non solum ad *elocutionem*, sed etiam ad *inventionem poëticam*, scitu sunt necessariae. *Synonymorum* enim, quae salvo sensu ex populari loquendi consuetudine substitui possunt, copia inservit *variationi*, ne semper eaedem voces redeant, id quod non solum turpem magnarum linguae latinae divitiarum ignorantiam comprobaret, sed etiam taedium legentibus excitaret; *epithetorum* porro, unicuique notioni convenientissimorum, cognitio elocutioni poëticae affert miram quandam perspicuitatem, gravitatem egregiumque vigorem; *phrasium* deinde *integrarum*, quibus poëtae utuntur, scientia evehit sermonem vulgarem ad poëseos praestantiam, et *copiosiores* denique *comparationes et descriptiones* inserviunt inveniendis picturis, quibus ingenii poëtici cognoscitur excellentia. Ad ipsum vero hujus libri usum quod attinet, nolite illum modo tunc evolvere, cum vel ad invenienda synonyma et epitheta, vel ad eligendas dicendi formas ejus auxilio indigetis, id quod parum Vobis prodesset; sed potius frequentiori lectione, quae *indolis poëseos* notatu dignissima memoriae imprimit, familiaritatem aliquam cum illo contrahatis. Sed nihilo minus negari nequit, pristinum *Gradum ad Parnassum* non solum vitiis et erroribus, omnem fere numerum excedentibus, laborasse, quibus omnibus emendandis profecto impar fuisset unius patientia, sed etiam parum perfectum et absolutum fuisse in rebus, quas tractare et recensere constituerat, ut persuasum habeam, ejus utilitatem tantopere praedicatam *moderatioribus pristinarum scholarum desideriis* respondisse. Nam, ut nihil dicam de ingenti syllabarum numero, quas falso indicaverat, quam negligens

ubique locorum fuit in determinandis vocum *significationibus*, tam *propriis*, quam *impropriis*, et in recensendis *synonymis*, *epithetis*, *dicendi formis* rerumque *comparationibus* et *descriptionibus*, quam multa praetermiserat, quae inique desiderabantur, ita, ut *liberaliori censori* candide fatear, in tam horrenda et fere immensa istiusmodi vitiorum errorumque abundantia, nonnulla mihi potuisse elabi, quorum veniam humanissime mihi expeto, totiusque libri formam, si omnia cum rigore corrigerentur, aut artificis statera examinarentur, esse permutandam. Quantum tamen, *illa retenta*, in viribus meis positum fuit, tantum contuli ad *emendanda* vitia, et ad *addenda* scitu necessaria. Nam non solum *innumera* in assignanda syllabis quantitate, et in distinguendis vocum significationibus *vitia delevi*, sed etiam *synonymorum*, *epithetorum*, *phrasium* et *integrarum comparationum et descriptionum* numerum tantopere auxi, ut nunc quodammodo saltem locupletior hic liber in lucem prodiret. Summam vero operam collocavi in eo, ut non solum *permultas vocum construendarum formas*, easque solis in poëtis obvias, *una cum illarum imitatione*, indicarem, sed etiam ut *gravissima* ex optimorum poëtarum, *Ovidii*, *Virgilii*, *Horatii*, *Tibulli*, *Catulli* et *Propertii*, commentatorum *observationibus* adspergerem. Quibus omnibus inserendis, ne libri pretium augeretur, curavi, ut praetermitterem omnes *explicationes*, ad antiquitates, historiam, geographiam et mythologiam pertinentes, easque aliis ex libris addiscendas, et omnes *comparationes ac descriptiones*, ex auctoribus bonis prolixe transscriptas, nominato tamen auctore, quia in omnium manibus est, facile reperiendas. Simul denique necessarium putavi, ut *Prosodiam latinam* praemunirem, quae plura, quam frequentiores in scholis grammaticae, sed *breviter*, ad judicandam syllabarum quantitatem contineret.

His igitur dotibus qualibuscunque instructus, hic liber denuo in adspectum prodire ausus est, nihilque magis in optatis habeo, nisi hoc, ut *Praeceptoribus* Vestris, Vobisque, *Juvenes Amatissimi*, gratus acceptusque videatur. Cui eventus si responderit, *dulcissimum senectutis meae fructum* semper habebo. Scrib. Servestae, A. R. S. MDCCCXV."

*) „Quum haud pauca essent, quae a suscipienda hujus libri recensione animum meum deterrere viderentur, tamen ut hanc curam mihi paterer imponi, fecit imprimis id, quod diutius negare vix arbitrabar esse ejus, qui memoriam Caroli Henr. Sintenis, viri de scholis juvenumque liberali institutione optime meriti, sancte pieque coleret. Quid autem egerim, breviter narrabo. Primum sustuli vernaculas vocum interpretationes, quas, qui hoc libro utuntur, aut antea cognitas habent, aut, si nesciant, potius in lexicis quaerent. Tum indefesso studio notas illas ad judicandam syllabarum quantitatem ita perlustravi, ut et falsas corrigerem et omissas adderem, quod utrumque quavis pagina persaepe fieri oportuit. Nec minorem operam versibus locisque veterum poëtarum adscriptis, ubi mirum quantum peccatum erat, navavi. Haud raro etiam versus alios, ubi necessarium videbatur, substitui, et ubi nullos ille dederat, unum aut plures adjeci. Passim voces omissas recepi, quod tamen parce feci. Ne ceteram hujus libri molem minuerem, redemtor impediit, praeter *Prosodiam latinam*, quae in grammaticis nuper editis meliore ratione et via traditur. Scrib. Züllichaviae Cal. Maj. 1821."

**) „Artis poëticae latinae libri IV. auctore *Chr. Dav. Jani*, gymn. Hal. Sax. conrectore." Hal. 1774. Quaedam vel poterant, vel debebant emendari; verumtamen ego nolui manum injicere. Nam si *Maur. Seyffertus*, nunc gymnasii Brandenburgensis conrector, unus ex meis discipulis Vitebergensibus, quod conjicere licet, ex ejus „Palaestra Musarum" (Hal. 1834) Vol. II. P. 1. praef. p. IX., hunc librum innovatum dederit, magnum habebit operae pretium. Quantumvis enim recentissima aetas poëtas latinos antiquos summa cura expoliverit, multa tamen illustranda restare, docent, ut paucissimis utar exemplis, *C. G. Jacobi* quaestiones epicae s. symbolae ad grammaticam latinam poëticam (Lps. 1839), *C. A. M. Axtii* annotatt. ad *Vestritii Spurinnae* reliqu. lyr. Francof. 1840, *M. Hauptii* Observv. critt. modo curavi, ut, quidquid adderetur, demendis aliis rebus minus vel aptis vel necessariis summum meum brevitatis studium compensaret. In primis autem constanter cavi, ne, quidquid grammaticae et lexica*) pueris offerunt, ullo modo hic repeteretur, ac ne minutim enuclearentur, quae vel tironum ingenium facile caperet. Neque enim puerulis, qui prima versuum elementa discunt, destinatus est hic liber, sed provectioribus, qui ipsi jamjam componere, ut ajunt in scholis, et altius evolare solent. Illis scripti sunt ejusmodi libri, qui, quibus opus est adjumentis, in se habent, nec unquam hujus *gradus* usum requirunt; his aperiendae sunt quasi quaedam sylvae rerum poeticarum, in quibus parata inveniant, quae, prout visum fuerit, in usus suos convertant. Verum tamen, quia aliis locis (cf. supra pag. VI. not. *b.*) uberius eam rem exemplis allatis exposui, ne longior sim, lectores ac judices meos illuc ablegare liceat. Pro multis igitur nominibus, quae saepius iteranda essent, positae sunt primae litterae; descriptiones longiores, quae facile peti possent ex notissimis poetis, quorum exemplaria artis stereotypicae ope nunc sunt multa et vilissimo pretio venduntur, ipsae resectae sunt, sed accurate allatus librorum ac versuum numerus. Comicorum exempla, quae *Lindemannus* **) dedita opera attulit, ego rarissime commemoravi, non quo hos poetas non censerem legendos adolèscentibus, sed quia, qui nunc faciunt versus latinos docti et indocti, ab hoc genere fere abstinent.

Ita instructa a me editione vulgatus est a. 1828 Tom. I., a. 1830 Tom. II. Opinione citius novam curam flagitavit nuper librarius. Cujus festinationi licet aliquid concedendum esset, tamen, quia non indotatum in manus emtorum dimittere librum et volui et debui, retractavi omnia accuratius, multa correxi, quaedam commodius disposita ad genera sua revocavi, alia delevi, alia addidi; sed chartae sumtibusque parcentem formam majorem elegi et in angustissimum spatium omnia coarctavi. Praecipue autem, quod in Germania hucusque nondum quemquam fecisse jure mireris, quum Gallorum exemplum optimum adesset, scriptorum ipsorum, ex quibus depromtae sunt phrasium copiae, nunc quidem addidi nomina, si certo constarent. Ita adolescentes, quid sit epicorum, quid elegiacorum, quid lyricorum, quid didacticorum, quid scenicorum, quid reliquorum poetarum, ante oculos habebunt, et a perversa commixtione horum generum, quae veteres non solum formis et vocabulis, ut ceteri populi, sed ipsa metrorum ratione accurate discernebant, diligenter sibi cavebunt. Ac debebam fortasse etiam, quod *Lindemannus* fecit diligentissime, quantitatum testimoniis librorum ac versuum ipsorum numerum appingere; verumtamen, dummodo certum esset, nomen poetae posuisse satis existimavi, iis quidem verbis integris praemissis, ex quibus, quid sibi vellent, manifeste intelli-

Habet igitur liber, qua se tueatur, in suo genere laudem egregiam.

gerent vel puerali. Saepius vero incertis certiora, obscuris clariora nunc substitui. Volebam etiam sententiolas quasdam inprimis memorabiles ita afferre, ut, uno versiculo mente comprehenso, plurium vocum mensuram tenerent discipuli, et simul sive re cognitu jucunda sive admonitione salubri adverterentur. Veluti vulgatissimum illud: *Donec eris felix, multos numerabis amicos* mea opinione adscribendum erat his vocibus: *donec, ero, felix, numero, amicus.* Similiterque *Arma virumque cano, Trojae qui primus ab oris* repetendum in his vocabulis: *vir, que, cano, Troja, qui, primus, ab, ora.* Nam *multus* et *arma* aliaque id genus, quamquam sunt, qui ne in his quidem diligentiam desiderari velint suam, sine auctoritatibus dimisi. Ac paene ridiculum est, quod in omni phrasium apparatu cujusvis syllabae, etiam puerulis non ignotae, mensuram ponere non erubuit, quisquis et olim et nunc libros similes edidit. Quis enim eos consulet, quin ista bene teneat, vocalem ante vocalem corripi, duabus consonis sese excipientibus positionem fieri, et quae sunt hujusmodi sexcenta? Scilicet haec est consuetudinis vis, quae ducit volentes, nolentes trahit.

Quod autem fuit *), qui imprudenter auxisse me diceret phrasium apparatum, quia discipuli, versus latinos scribere jussi, soleant undique corrasos versiculos conglutinare, et in meis voluminibus furti faciendi et occasionem et materiam habeant paratissimam, id vero, rectam docendi rationem, multo usu et ipsa natura comprobatam et ab intelligentissimis viris quotidie magis magisque nunc commendatam sequi si quis voluerit, falsum esse perspiciet. Primum enim, quod caput est, qui praeest his exercitationibus, ipse debet non solum rei esse peritus **) ac bene memoria comprehensos habere locos poetarum veterum ac recentiorum clarissimos, quos attuli, sed etiam iisdem uti studiorum adminiculis, quibus utuntur discipuli, ut, quid simpliciter, quid fraudulenter fiat, facillime videre queat. Deinde ipsa ista, quae tantopere sese jactat, parsimonia ac paene tenacitas tardioris mentis adolescentulos misere excruciat, ita, ut, quoniam nihil auxilii vident, caput perfricent, calamum unguesque rodant, et totum hoc studiorum genus, quod ipsum per sese non magnopere commendatur a superciliosis quibusdam vel hujus aetatis, vel etiam antiquitatis totiusque philologiae patronis, tanquam ingenii tormentum, non lene, ut Horatius habet, sed horribile, quia inane, odisse incipiant. Ac sane fit hoc plerumque, ubi pueri non tam, materia aliqua subjecta, versus scribere, quam nudi relicti poemata componere jubentur, quod non habebit successum, nisi vel ingeniosiores certa via ac ratione a facillimis ad difficiliora, ut in ceteris rebus discendis, prudenter traduxeris. Qua in re mirum quantum

*) „Gradus ad Parnassum, sive Thesaurus latinae linguae prosodiacus. Novam editionem emendatam et locupletatam instruxit *Jul. Conrad.*" Lps. 1830. Qui quale consilium secutus sit, mihi quidem nunquam satis apparuit. Videtur autem potissimum voluisse vilioris pretii librum exhibere: quod ipsum, quum frustra primum fuisset, grandiore etiam proposito, resipiscens librarius, ut extruderet mercem, postea aliquoties valde imminuere coepit. Quidquid autem id est, quod hic commemoro, non fit ad invidiam vel inferendam vel depulsandam, sed ut mearum rerum rationem exponam. Adeo enim honorificam et amicam mei mentionem Afrani a. 1836 laeto convivio undecunque congregati fecerunt, *Dillero* V. D. praesertim interprete (cf. Monumenta Afrana. Mis. a. 1836. p. 17 sqq.), ut mihi absenti laetissima acciderent, quae ille p. 21 scripsit: „Memorabile est, qui recentiori aetate laborarunt in adornando excutiendoque illo thesauro prosodiaco, omnes fuisse disciplinae nostrae alumnos. — Hoc putaverim ad disciplinae nostrae laudem vel maxime pertinere, quod Afrani sunt, quos labente paulatim artis poëticae honore poësis latinae statores praedicare possis."

**) Cf. quae nuper non sine causa conquestus est ea de re *C. A. M. Axtius*, quondam in lyceo Vitebergensi meus discipulus, nunc professor gymnasio Crucenacensi praefectus, in libro bonae frugis plenissimo „üb. d. Zustand der heutigen Gymnasien." Wetzlar. a. 1838. p. 125 sqq.

etiamnunc in hujus aetatis luce et omnium rerum perfectione peccari a praeceptoribus multis certo scio *).

In epithetorum farragine novam quandam ac meliorem viam ineundam esse ipse intellexi. Maxime autem probabilis mihi visus est *I. M. Gesneri* labor, qui in thesauro linguae latinae litterarum ordine alphabetico ejusmodi res explicuit. Quem quominus imitarer, ut verum fatear, impedivit librarii festinatio. Synonymorum quoque major ratio poterat haberi: quamquam difficile est, si breviter simul accurateque id facere velis. Praeterea quum lexica, quibus utuntur pueri in scholis, ex peculiaribus libris, qui ejusmodi res nuper vel accuratius investigarunt vel commodius explicaverunt, potiora omnia desumserint, illuc, tanquam ad fontes, licet accedere.

Quibus in rebus omnibus efficiendis etsi ego mihi ipse satisfacere non potui, spero tamen fore, ut, quam hucusque non improbatam vidi operam, magis etiam jam probetur aequis existimatoribus, atque ut tota libri forma, quae non potuit repente immutari, sensim accessisse propius ad perfectionem videatur. De semet ipso difficile quidem est et dicere et tacere; nolo tamen veritatis confessionem subterfugere, ne cui debitum honorem subtraxisse dici possim. Fateor igitur, in hoc libro adornando

*) Quo magis enim indies excrescit in immensum rerum percipiendarum multitudo atque artium factitandarum varietas, non adolescentibus solum, verum etiam ipsis praeceptoribus rerumque publicarum administratoribus omnibus, eo constantius ac sollertius curandum est, ut fiat, quod *Schellingius* philosophus verissime simplicissimeque dixit: „Einzelnes thut es allerdings nicht mehr; einzeln (man ist davon überzeugt) kann Nichts eigentlich gewusst werden.“ Neque tamen ille solus, sed omnes, quotquot et sunt et fuerunt, philosophi hanc viam ad veram eruditionem esse voluerunt, ut summae rerum notiones mente comprehenderentur, ex quibus ceterae, veluti aptae ex causis et connexae inter sese, penderent. Quod quum, qui citra ultraque Rhenum ac Vistulam fluvios incolunt, perspicere coeperint omnes, multorum saeculorum experimenta faciunt, ut ex repetita vehementius partium contentione nunc tandem emergat laetior consensio. *Horatium* enim sequi debemus, qui ipse suo et exemplo et hortatu *sapere et fari* jubet, ut discant juvenes, id est ad veram humanitatem ut formari se patiantur. Sed de his rebus satis superque et ipse mihi videor exposuisse in epist. ad *Jac. Geelium* praefixa *Hemsterhusii* oratt. et epist. ed. 2. (Weilbg. 1839), et aliorum virorum voces auctoritatis plenissimas collegisse, cum in sex *Paraenesium* voluminibus (Brunswig. 1827 sqq.), tum in *biblioth. lat. scriptor. aetat. recent.* Vol. 1. 2. (Lips. 1840). Unum autem ac non leve vitium concepit aetas nostra. *Sapere* enim dum juvenes docere voluit, rimari potius et dubitare ac disceptare licentius eos assuevit, quam recte modesteque deliberare ac ratiocinari. Tum vero, *fari* ut discatur, non potest fieri sine diuturna ac diligenti scriptorum excellentium omnium imitatione, veluti pictores ac statuarios futuros facere videmus. Nostri autem adolescentuli stilum, quem optimum dicendi magistrum dixit Cicero, aut raro in manus sumunt, aut sumtum mox abjiciunt, et audiendo, legendo, disputando, si modo, tempus omne operamque consumunt, pauci majorum more rhetoricis et poëticis exercitationibus, praesertim latinis, strenue institutis delectantur. Dedi igitur summam operam, ut, ubicunque terrarum essem, antiquam illam versuum latinorum componendorum artem, ubi explosa et expulsa esset ex scholis ac fere ex memoria hominum, reducerem et pristino honori restituerem, ubi vacillantem usum vidissem, firmarem. Quod studium quum simul ad caeteras linguas transferrem, vernaculam, graecam, gallicam, vidi egomet, nisi natura torperent aut consuetudine mala obduruissent, animos praeceptorum ac discipulorum alacriores fieri fructusque inde nasci laetissimos. Ac coepit sane redire in multas Germaniae scholas hoc studiorum genus, perversa quorundam clamatorum contumelia antea rejectum. Fuerunt autem etiam, quae nunquam deponerent, veluti in Austria, in Britannia, in Gallia, ubi constantissime usque ad hunc diem colitur. Borussia, si quidem recte audivimus, nec impedit publice, quod factum alibi esse dicitur, neque magnopere adhortatur, sed libero praeceptorum arbitrio permittit, quo fit, ut vere appellari possit liberale hoc studium, quippe nullis aut edictorum jussibus impositum, aut examinum minis extortum, et ut, eam artem qui exercent adolescentes, inprimis ingenui liberaliterque educati rite dicantur.
